PROFESSIONAL SUMMARY

Enterprise Applications & Integration Specialist with 15+ years' experience driving enterprise integration, application governance, and digital transformation across telecom, consulting, and IT services.

- **Architect of Atlassian ecosystems** (Jira, Confluence, JSM) across cloud, data center, and hybrid environments, ensuring security, compliance, and scalability.
- **Expertise in enterprise integrations and platform migrations** with DocuSign, GitHub, Microsoft Teams, Copilot, Slack, ChatGPT, Adobe Admin and Greenhouse.
- **Proven track record** of reducing operational costs, accelerating approvals, and enabling business agility through platform optimization, SSO/Entra ID controls, and compliance frameworks.

LICENCES & CERTIFICATIONS

- ACP-420 Atlassian Certified Jira Service Project Manager
- ACP-100 Atlassian Certified Jira Administrator for Data Center & Server
- Microsoft Certified: Azure AI Fundamentals

EXPERIENCE

Enterprise Platforms Architect

TII /Sundus Recruitment & Outsourcing Services / AL Nahiya Group LLC | Mar 2024 – Present

- **Atlassian Infrastructure Modernization:** Atlassian instance migrations across cloud and on-premises environments for multiple instances, implementing full backup strategies to ensure data integrity, security, scalability, performance, and cost efficiency while optimizing infrastructure and reducing costs.
- **Enterprise Integrations & Automation:** Implemented DocuSign, GitHub, Microsoft Teams, Slack and Copilot integrated with Jira & Confluence, ChatGPT, Greenhouse, and Atlassian tools to streamline digital signatures, collaboration, recruitment processes, and workflow automation.
- **Identity & Security:** Enforced identity governance, SSO, and compliance via Microsoft Entra ID.
- **GlobalSign Certificates:** Generated and managed GlobalSign digital certificates for secure authentication and communication.
- **AWS Route 53 Responsibilities:** Managed 33+ hosted zones, including adding/modifying TXT, CNAME, A, and MX records, troubleshooting DNS issues, and ensuring high availability and resilience for domain services.
- **Signature Management:** Designed and governed organization-wide email signature and disclaimer frameworks, ensuring consistency and compliance across multiple subsidiaries.
- **Service Delivery Leadership:** Established JSM-based service desk models, integrating SLA policies, automation, and dashboards to reduce resolution time by 35%.
- **Executive Enablement:** Delivered C-level reporting dashboards and governance workshops, aligning IT delivery with business KPIs.

KEY ACHIEVEMENT — ATRC Connect: Enterprise Unified Approval Platform

- **Platform & Impact:** Architected a unified approval platform integrating 6–10 systems (DocuSign, ITSM, SAP & more) into a single interface for 1,000+ users, cutting approval cycle time by 80% (5 days → 1 day) and eliminating 10-app context switching for leadership.
- **Cost Savings via AI-Assisted Development:** Built entirely using vibe coding (AI-assisted development), avoiding AED 500K–750K in traditional vendor and licensing costs — delivering full ROI from day one.

Atlassian Expert

PractiProject | Atlassian Platinum Solution Partner | Feb 2022 – Feb 2024 (2 years)

- **End-to-End Migration Leadership:** Spearheaded the migration of JIRA from 8.4 to 9.12.x and Confluence from 7.13.x to 8.5.x, overseeing all phases from requirement gathering and planning to execution and post-migration optimization. Ensured zero downtime and facilitated training and knowledge transfer for internal teams.
- **System Architecture & Optimization:** Led efforts to optimize legacy Atlassian solutions, re-architecting and enhancing the performance of both JIRA and Confluence environments. Conducted in-depth performance analysis resulting in measurable improvements in system reliability, scalability, and speed.
- **Automation and Customization:** Designed and implemented advanced Groovy scripts to automate complex workflows between JIRA and Confluence, drastically reducing manual tasks and increasing operational efficiency. Customized workflows and user interfaces to align with specific business needs.
- **Advanced Configuration & Integration:** Drove the configuration of high-level solutions utilizing tools like Comala Workflow, ScriptRunner, and Snapshot Publishing. Integrated third-party add-ons (e.g., Electronic Signature) to extend platform capabilities.
- **Continuous Improvement & Innovation:** Championed the adoption of new features and technologies within the Atlassian suite, continuously evaluating new tools, plugins, and methodologies to improve system efficiency and ensure alignment with industry standards.

Enterprise Applications Lead

Etisalat UAE | May 2014 – Jan 2022 (7 years 9 months)

- **System Integration & Appraisal Management:** Integrated assignment-level and annual appraisal lifecycle processes with the current assignment/audit management system, enhancing operational efficiency.
- **Risk Management Implementation:** Spearheaded the implementation of a risk management system in collaboration with Risk Champions, strengthening organizational risk practices.
- **User Management & Support:** Managed system access for 1,000+ local and remote users, ensuring compliance and maintaining best practices.
- **Atlassian Suite Administration:** Migrated Jira from version 6.2 to the latest, defining and executing a robust migration plan. Performed daily instance administration, including performance tuning and scaling.
- **Reporting & Process Optimization:** Designed and maintained reports, dashboards, and filters, leveraging third-party add-ons for enhanced insights. Identified and implemented new process improvement opportunities.
- **Project Leadership & Presentation:** Prepared and presented IT projects to leadership teams, including managers, directors, and VPs, to determine optimal solutions.

Senior Software Engineer

L&T IES | Jan 2014 – Apr 2014 (4 months)

- Delivered technical solutions using Kendo framework; maintained coding standards via SONAR; configured Spring and Spring DAO classes.

Software Engineer

CenturyLink | Jan 2011 – Jan 2014 (3 years 1 month)

- Delivered technical solutions using JQuery Mobile, plugins (JQueryCycle, HighCharts), and custom JQuery UI widgets. Debugged portals with Firebug/IED and modified velocity templates.
- Automated Dimension check-out and Selenium HTML-to-JUnit conversion scripts. Maintained code quality via SONAR analysis and reporting.

EDUCATION

B.Tech, Computer Science and Engineering JNT University | 2004 – 2008
